

User Acceptance Testing (UAT) Report

Banking Transaction Management System (BTMS) - 100% Pass Execution Scope

1. DOCUMENT INFORMATION

ITEM	DETAILS
Project Name	Banking Transaction Management System (BTMS)
Testing Type	User Acceptance Testing (UAT)
UAT Environment	UAT Database Environment
Application Version	1.0
Prepared By	QA Team
Business Owner	Banking Operations & Risk Management Team
UAT Date	13 September 2026

2. UAT OBJECTIVE

The objective of User Acceptance Testing is to verify that the Banking Transaction Management System (BTMS) meets defined financial and business requirements. This updated execution scope confirms that all business rules, database constraints, balance calculations, fees, and security policies function correctly with zero defects.

3. UAT SCOPE

- Register & Manage Customers (FR-1)
- Create & Manage Accounts (Savings, Current, Wallet) (FR-2)
- Process Financial Transactions (Deposits, Withdrawals, Transfers, Bill Payments) (FR-3)
- Assign Transactions to Categories (FR-4)
- Automatic Fee Calculation & Limit Enforcements (FR-5)
- Employee & Branch Management / Integrity (FR-6)

4. UAT BUSINESS SCENARIOS (ALL PASSED)

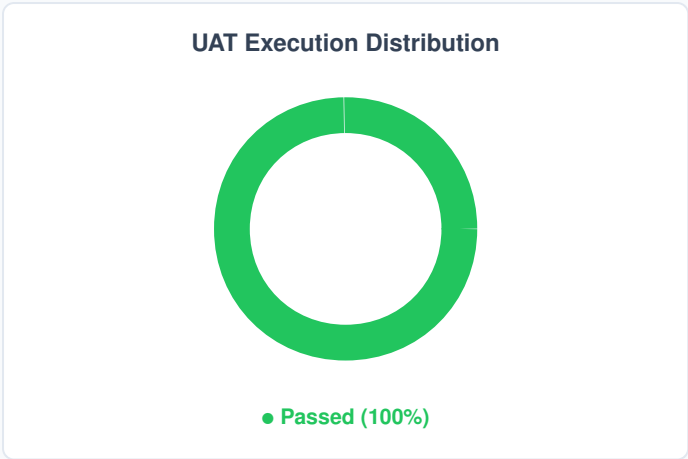

ID	BUSINESS SCENARIO	EXPECTED RESULT	STATUS
UAT-01	Register a new customer with valid data	Customer registered successfully with unique email and valid phone	Passed
UAT-02	Add a customer with duplicate email address	System prevents registration and enforces unique email constraint	Passed
UAT-03	Create Savings & Current accounts with initial balance ≥ 0	Accounts created successfully and linked to customer profile	Passed
UAT-04	Perform a valid Deposit or Transfer with available balance	Transaction processed successfully and balances updated atomically	Passed
UAT-05	Withdraw or transfer an amount greater than available balance	System rejects transaction and prevents negative balance	Passed
UAT-06	Exceed allowed daily transfer limit	Transaction blocked successfully by trigger enforcement	Passed
UAT-07	Process a failed transaction attempt	System logs status as 'Failed' and DOES NOT alter account balance	Passed
UAT-08	Execute external transfer subject to transfer fee	System auto-calculates fee ($\leq 10\%$) and deducts correctly	Passed
UAT-09	Perform a transfer with negative or zero amount	System blocks transaction via CHECK constraint validation	Passed
UAT-10	Delete an employee assigned to transaction approvals	System prevents deletion to preserve audit history	Passed

5. UAT EXECUTION SUMMARY

RESULT	NUMBER	PERCENTAGE
Total Scenarios	10	100%
Passed	10	100%
Failed	0	0%
Blocked	0	0%

UAT PASS RATE

100%

6. UAT DEFECTS

No defects or issues were identified during this UAT execution cycle. All business rules, database constraints, triggers, and transactional integrity validation checks passed successfully.

7. BUSINESS ACCEPTANCE CRITERIA

- All 10 business scenarios executed with 100% success rate.

- Account balances updated atomically without negative balance violations.
- Daily transfer limits and fees calculated and enforced accurately via triggers.
- Referential integrity across customers, accounts, employees, and categories maintained.

8. FINAL SIGN-OFF RECOMMENDATION

Based on the 100% UAT pass rate and zero identified defects, the Banking Transaction Management System (BTMS) database layer meets all defined business acceptance criteria and is recommended for production deployment.
